Hi Ray,

The missing comment on slide 26 was a question about what the "original curve" referred to.

The aquifer exemption boundary is always 120 ft outside the monitoring well ring.

I am interested in hearing about Powertech's reaction to the presentation. I am glad you are giving them a chance to see it. That will prepare them for what they will see in the permit.

Hi Valois,

Thanks for the review and comments. I will get things fixed up.

I could not find your comment on slide #26 – is it hidden somewhere.

Just to be clear on the aquifer exemption area, is it always 120 ft. away, surrounding the injections wells?

By the way, I invited Powertech to my 2:30 PM presentation at the USGS (along with a bunch of other folks). That will be the "open session". The EPA gets a special private showing!

Thanks,

Ray

Hi Ray,

This is great! I just had a few comments. If you go to the *Review* tab and click *Show Comments* they will show up when you get to the slides I commented on.

On Slides 7, 9 & 35 there were just typos in the notes section.

I have comments or questions on slides 5, 6, 8, 19, 20 & 26.

Thanks for the preview!

I look forward to the presentation.

Hi Valois,

I thought you might be interested in a draft of my Aug. 27th presentation. I do not think too many additional changes will be required, but if you see an error in something, let me know.

I can send you the final version a few days ahead of time, so you can get it loaded up on your end.

Happy Friday,

Ray
